PRE-CONFERENCE WORKSHOP

Our conference always kicks off with a pre-conference workshop called Telehealth 101 & 102. This four hour program is meant to give those new to the industry a better grasp of what it takes to have a telehealth program. We'll cover basics on technology, operations, and telepresenting (how to present a patient for proper care). Our Telehealth 102 session will cover regulatory and legislative topics both from a national standpoint and also for each of our seven states in the Northwest.

Telehealth 101
Join us in this workshop with Cindy Roleff, MS, BSN, RN-BC, as she walks through the basics of getting started with telemedicine. The session will conclude with Providence Health giving an overview of telepresenting.

Telehealth 102:
State Legislation & Regulation
This will be a panel session with representatives from all seven of the NRTRC regional states. The Centers for Connected Health Policy will be moderating the panel with their excellent national policy expertise.

CLINICAL/ADMINISTRATIVE TRACK

New Ethical Dilemmas in the Digital Age
Joyce Hartje, PhD
Nancy Roget, MS, MFT, LADC

Palliative Care Direct to Consumer: An Innovative Model for the Delivery of Specialized Care
Christopher S. Piromalli, DO, MPH
Karen Hollar, LCSW
Rona Johnson, RN, BSN, OCN, CHPN

Telehealth Legal & Contracting Structures: Building Sustainable, Scalable Arrangements
Nathaniel Lacktman, Esq

Telepsychiatry Collaborative Care: Improving Access & Outcomes
Jennifer M. Erickson, DO
Sarah Haack, MD, MPH

TelePsychiatry Consulation Program for a Community Hospital in Washington
Brandon Weiland, APSW-MSW
Mark Newman, MD
Ramanpreet Toor, MD

TECHNICAL TRACK

Technology Lab with Telehealth Technical Assessment Center
NRTRC will join forces with the Telehealth Technology Assessment Center (TTAC) to offer conference attendees hands-on learning and testing of telehealth peripherals. The session is aimed at helping providers and technologists to have hands-on experience with a wide range of peripherals, with "patients" in one room and healthcare professionals in another room using the devices. We'll be offering two sessions so everyone will have a chance to take a look and listen to the peripherals available. Don't miss this opportunity to find out for yourself how these devices work to meet your needs!

NEW THIS YEAR!
